NOVEL100 is UV/Visible spectrophotometer, combined with ARM processing core. Automatic wavelength makes the instrument have the test speed and function of high-end instruments. It can meet the qualitative and quantitative analysis of most samples in the visible spectrum range of conventional laboratories. It is suitable for application in the departments of medicine and health, clinical examination, biochemistry, petrochemical industry, environmental protection and quality control.

Technical Specification:

- 8-inch color touch screen, realize simple and effective human-computer interaction, and clearly display test data and scan results.
- Built-in thermal printer (optional), to achieve the printout of test results, facilitates the formation and storage of data reports.
- USB communication port and included COLO visible spectrum software, realize data and map processing functions, and storage of massive data files, and provide convenience for customers' secondary development. Instrument software control, recording and data processing
- With full-band scanning, sub-band scanning, dynamic time scanning, automatic wavelength adjustment, automatic empty probe measurement, auto zero, linear regression, concentration direct reading, peak and valley detection, automatic concentration determination by the calibration curve, timing printing and other functions. Concentration factor setup and direct reading of concentration. Up to 10 calibration standard. Quantitative curve up to 3 wavelength.
- Advanced power-off protection measures can memorize test data, scan spectrum, regression equations and instrument correction parameters to achieve rapid initialization.
- The possibility of easy selection of different recording modules: spectral, photometric and kinetic.

Maximum 0.001 Abs/h 1 hour after starting the instrument

Options:

- Built-in thermal printer
- COLO UV/Vis visible spectrum software Included
- 5cm or 10cm cuvette holder manual or automatic (optional)
- Standard 4x1cm cuvette holder included (automatic is optional)

Power Supply:

- Power supply voltage: AC220V  $\pm$  10%V 50Hz-60Hz
- Rated power: 100W

## Wi Fi UV Lamp control - option

To ensure a longer lifespan of the UV lamp, with a built-in WI FI control connection, you can turn it on or off separately via your android device or by touch screen

## LCD Touch Screen Digital Display

10,1 inch capacitive touch screen, to display curve, import test data, setting parameters

## Professional Software

Professional COLO Software is a standard configuration

## Manual or Automatic Cell Holder

From micro cell to macro cell 100mm large 4 or 8 places manual or automatic cell change control

## Human Interface with Help menu

Built in help menu provide shortcut to the important information about main instruments parameter
